LEGAL DISCLAIMER

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability;

gm token shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your whole investment.

Investment risks;

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

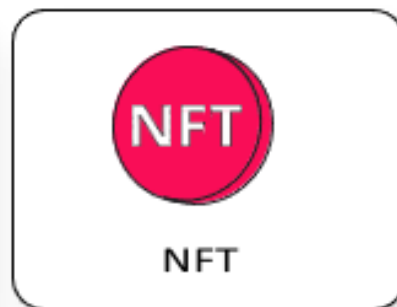

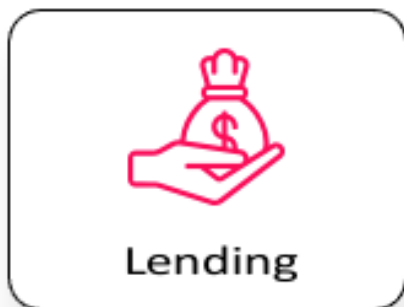

INTRODUCTION

AVIOR PROTOCOL token is a blockchain decentralized platform based on Multichain which is going to bridge with other blockchains of the modern world. AVIOR network is designed as a high-performance to provide many services in 1 platform. AVIOR will be a whole ecosystem that will provide features like Staking, NFT Marketplace, Exchange, Swap, Lending/Borrowing under an umbrella. AVIOR will develop its own unique NFT marketplace and will connect the decentralized community. People will now be able to own exclusive rights on NFT.

We're more than simply a token; we're the future of decentralization and exchanging in an open-source, censorship-resistant ecosystem built on modular frameworks. With carefully established tokenomics, Avior is designed to balance all parts of its system and ensure justified long-term growth. Users will be able to earn yield in the form of AVIOR tokens by staking. With decentralized crypto exchange, we're reinventing the market by creating a more open, accessible, and fair global financial system. Unlike other traditional platforms, Our ecosystem allows users to track their crypto-assets and send/receive messages to increase the value of their crypto- assets.

Key Features:

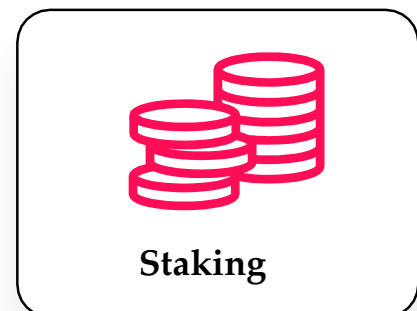

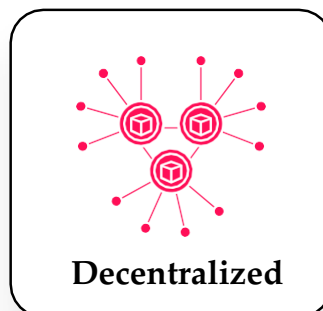

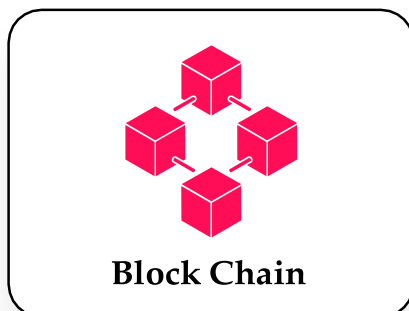

INTRODUCTION

AVIOR is high powered multichain protocol that contains the staking, NFT marketplace, and swapping facility under an umbrella. AVIOR also offers exchange services. AVIOR used blockchain technology to make its NFT marketplace Unique. AVIOR is also going to launch their Dapps and their own swap and exchange to make transactions more easy and accessible to everyone.

Its social commitments, ledger accountability, blockchain, and its development are so significantly planned that it indeed has optimum possibilities that this cryptocurrency's future and opportunities will be sky-high. It has been made Professional, accountable, effective, reverend, and technologically sound.

Avior will launch its own dAPP's for ios and Andriod to make it easy to use for all users. User can track their account, send, receive, lend and borrow through our dAPP's.

Key Features:

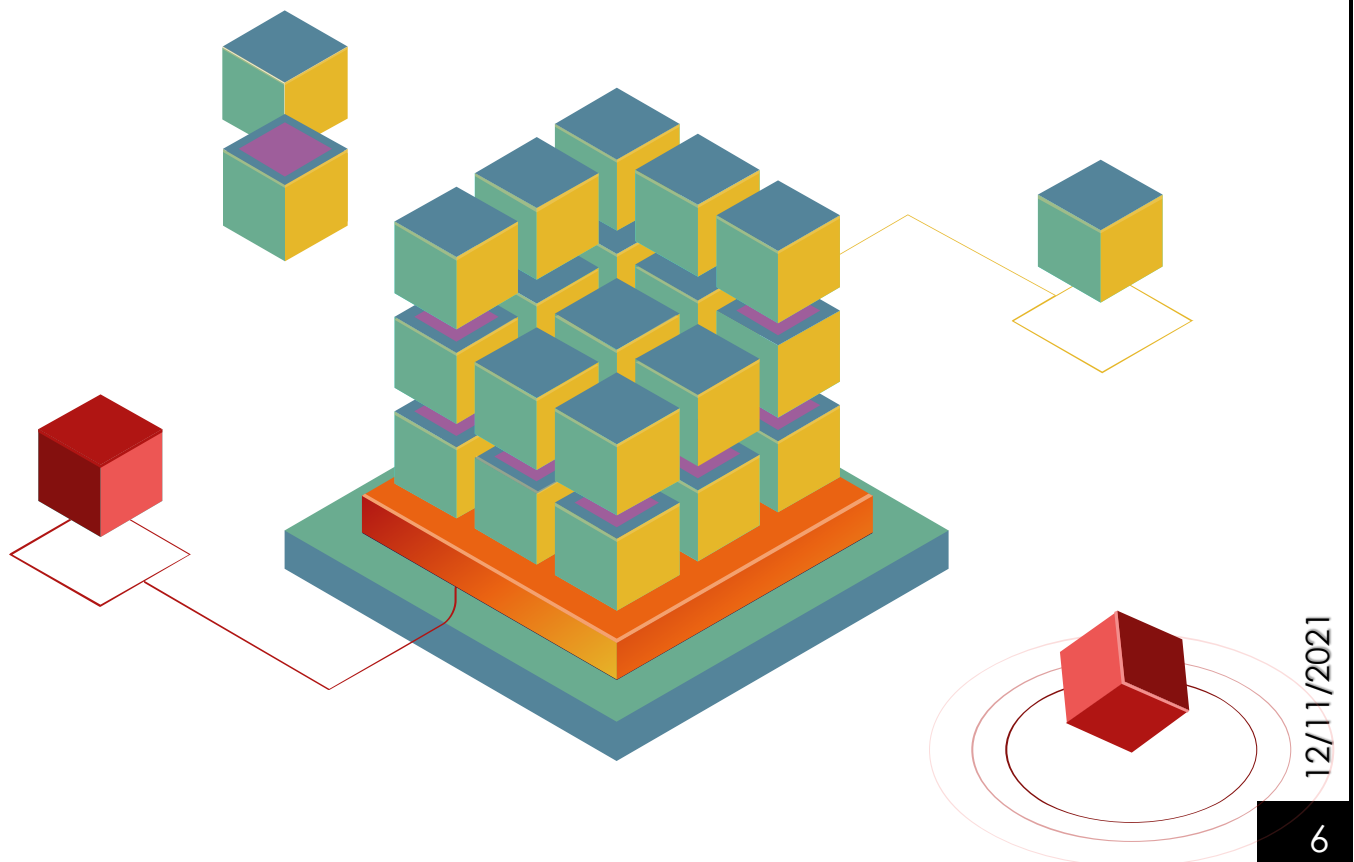

MISSION

Our mission is to "AVIOR to New Heights" by providing customers with an innovative, user-friendly, one-stop-shop to not only find everything they need to buy but also to research and make a more precise decision, using a decentralized blockchain platform to give everyone in the world an equal chance to manage and improve their financial security.

- Our goal is to make staking/lending/Borrowing and digital assets as easy as possible for all.
- In digital asset staking, reduce volatility and generate positive price pressure. Operate as a community-focused and community-driven digital asset that is completely decentralized.
- Our goal is to accelerate the adoption of decentralized peer-to-peer marketplaces by giving consumers the confidence to explore the blockchain and providing resources to help them construct the future of decentralization.

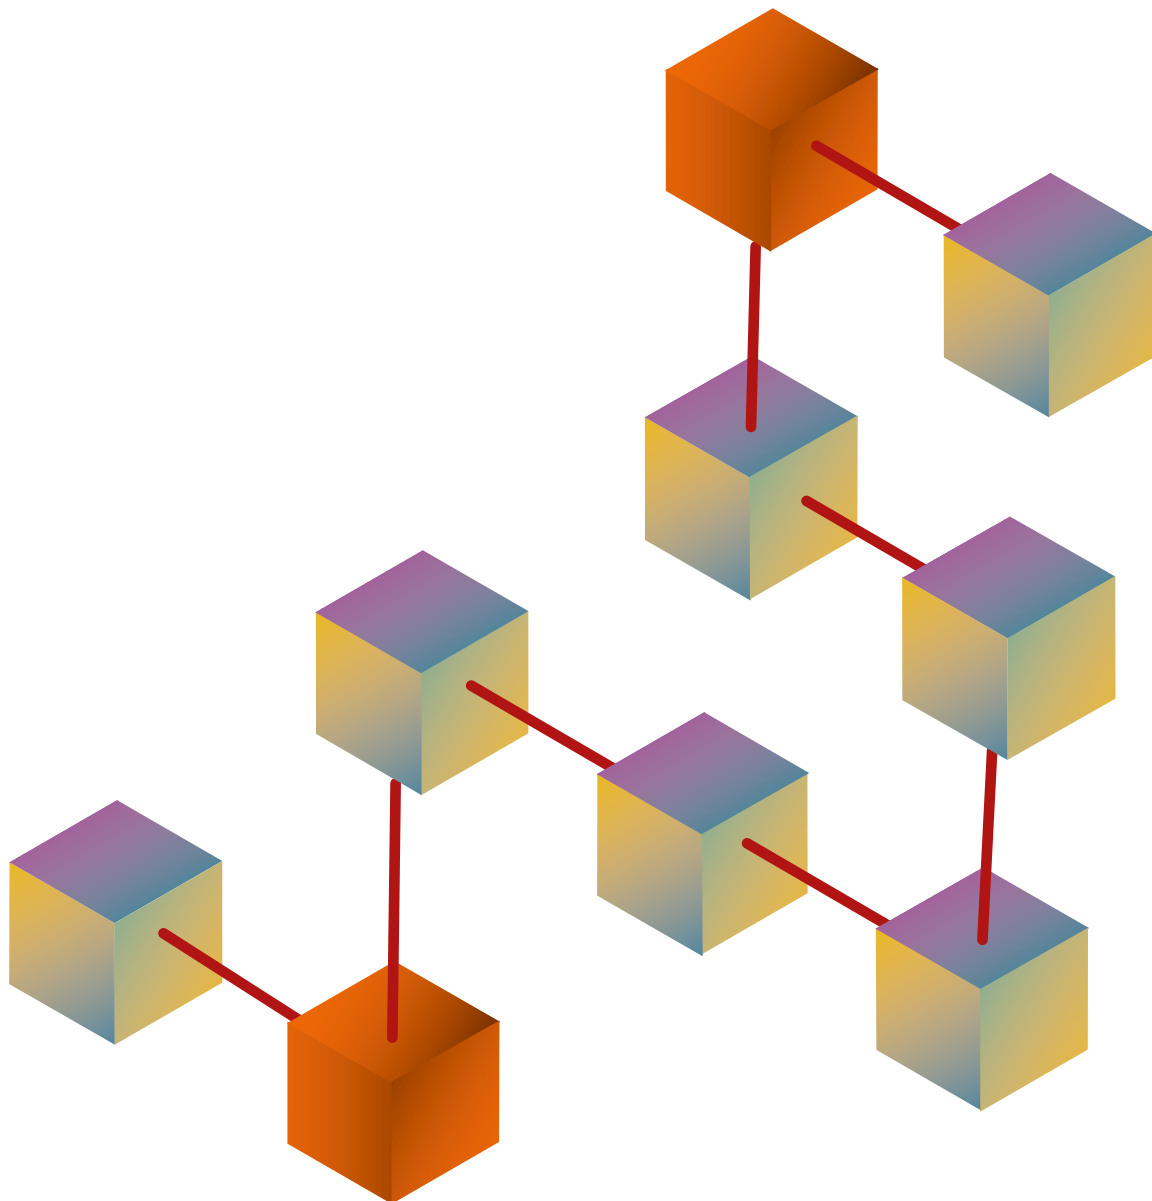

VISION

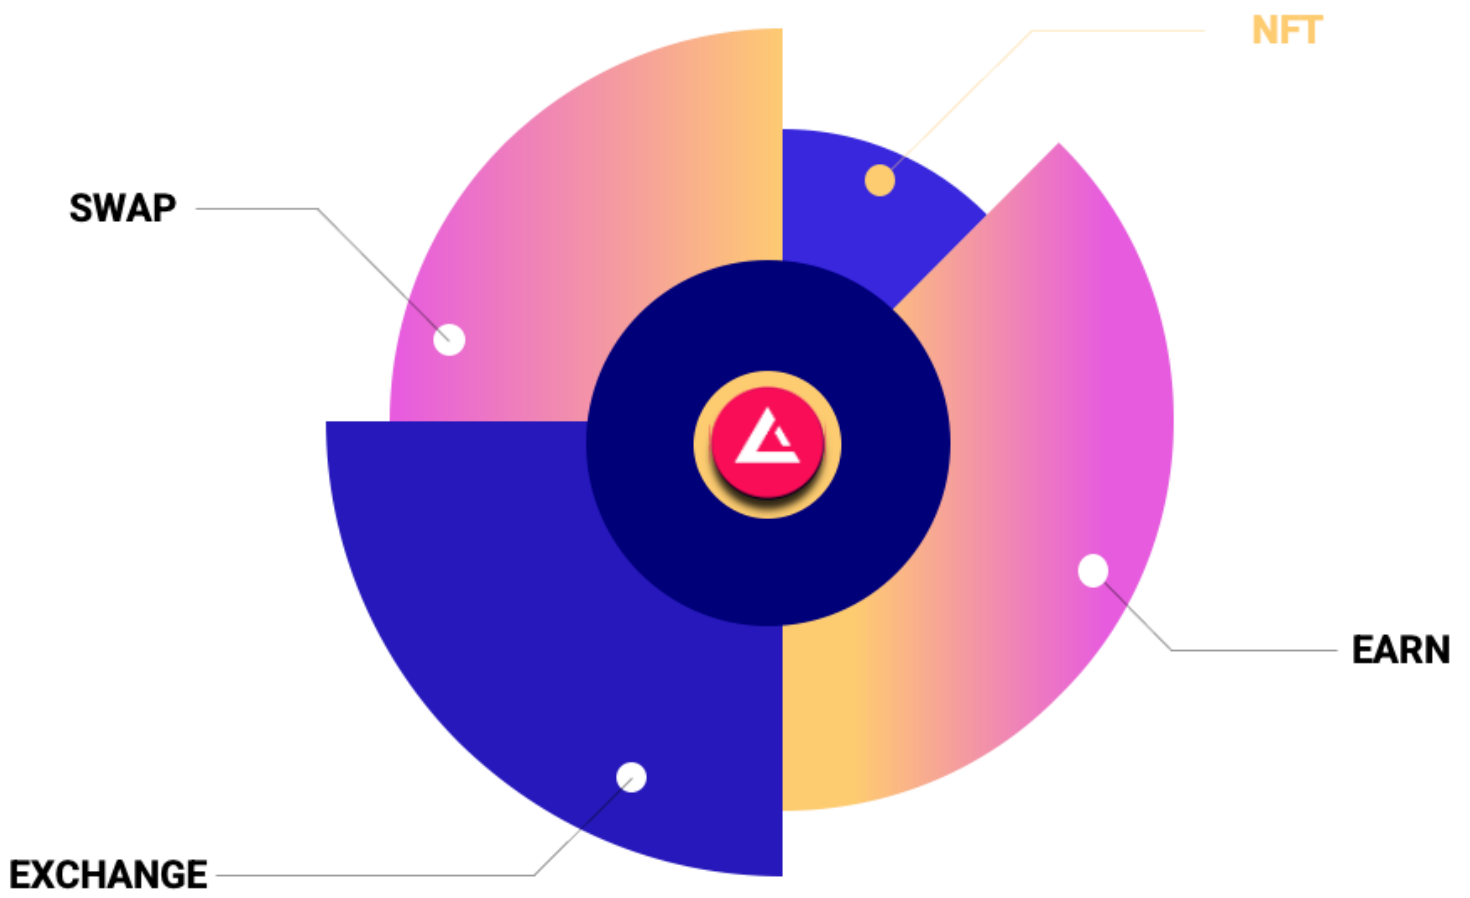

We foresee a world where people can receive whatever they need in one crypto ecosystem, and wealth-building strategies that were previously only available to the wealthy become available to everyone, restoring people's control over their financial systems. The AVIOR network will build a breakthrough ecosystem to attract more people into digital assets, allowing them to earn money by staking, trading, and lending/borrowing while keeping their privacy, security, authority, and autonomy.

The AVIOR token digital asset will be anticipated to develop an ecosystem built on strong monetary regulations and a stable decentralized basis.

ECOSYSTEM

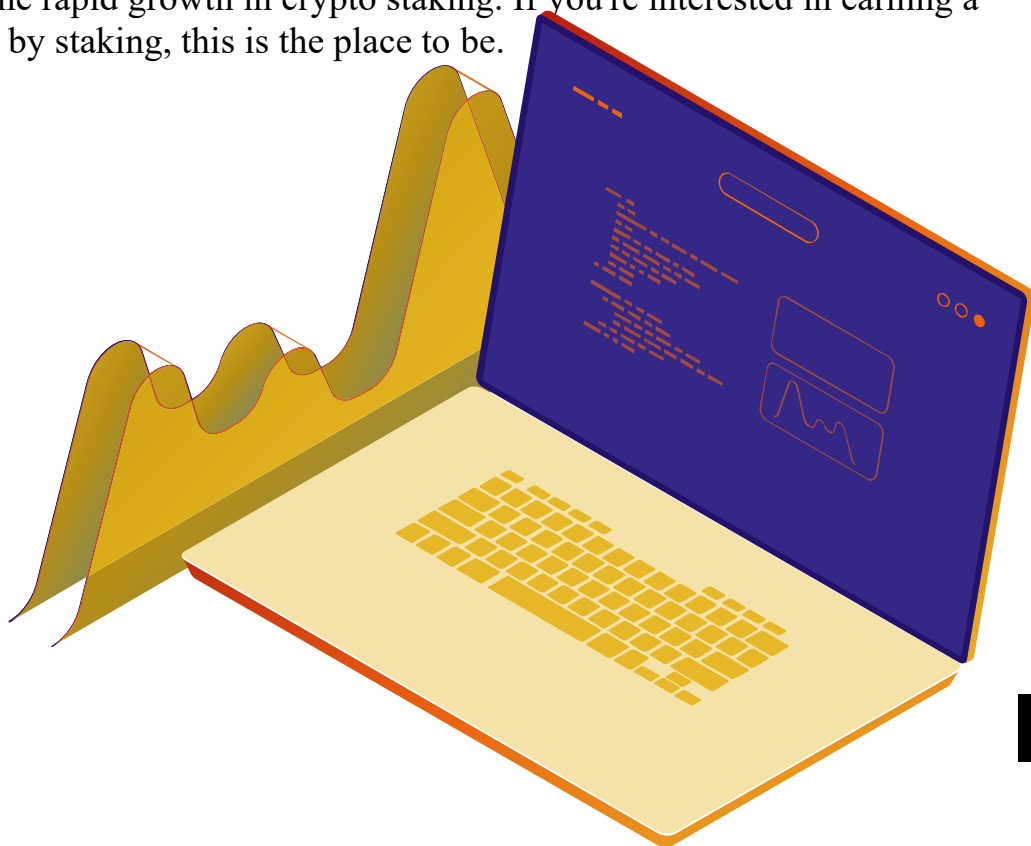

AVIOR STAKING

AVIOR Protocol works on Multichain Networks, which is eco-friendly, working on a proof of stake. In addition to being the largest crypto exchange by trading volume, it offers exemplary staking services. AVIOR Protocol ensures users' funds are safe by leveraging effective security measures and providing a Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and eco-friendliest methods (for cryptocurrency) to earn passive income. The platform stores all staked tokens using a secure wallet and a double-checking system.

AVIOR Protocol staking is quickly becoming a practice of gaining passive income by merely storing or locking funds in a wallet as more individuals, including institutional investors understand the crypto market's lucrativeness.

Since staking cryptocurrencies necessitates certain technological crypto know-how and compliance criteria, AVIOR Protocol staking platforms are useful for allowing investors, including those lacking technical knowledge of cryptocurrencies, to stake proof of stake (PoS) tokens and receive rewards. The staking network lends you their professional skills and authenticates stakes on your behalf for a small percentage of your staking prizes, allowing you to receive submissive profits. Staking platforms that enable investors to collect staking incentives have sprung up in response to the rapid growth in crypto staking. If you're interested in earning a passive income by staking, this is the place to be.

Benefits of staking

Staking is advantageous in cryptocurrency as it generates rewards by staking the token on any exchange and generating passive income. When an investor stakes a token and staking the pool, it is the easiest method to do, in a decentralized world. There is very sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining. AVIOR is here for you. There are a few quantifiable benefits of Staking token with AVIOR Protocol:

01

NO HARDWARE IS REQUIRED

Unlike proof of work, there is no need for specific equipment or hardware for crypto staking. Proof of stake works with no equipment requirements. The only requirement is to hold the token for an interval of time by the stakers on any exchange

02

PASSIVE INCOME

Stakeholders earn incentives by staking and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

05

MORE COST-EFFECTIVE

Pool of stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and eco-friendly. So, the stakers can earn more passive income by using AVIOR.

03

SCALABILITY

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in a variability of ways. Proof of stake protocols, as shown by AVIOR higher transaction outputs and lower fees, make for greater scalability.

04

ECO- FRIENDLIER

As Proof of stake blockchains are fewer energy-consumers, they are more environmentally friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

06

HIGHLY SECURED WITH THE HELP OF AVIOR CONTRACT

The biggest issue in the modern world is security and privacy, and AVIOR provides a swift and stable portal that is backed by the AVIOR contract, making him superior to others. AVIOR contract is offering a highly secure and fast platform to the users for staking crypto.

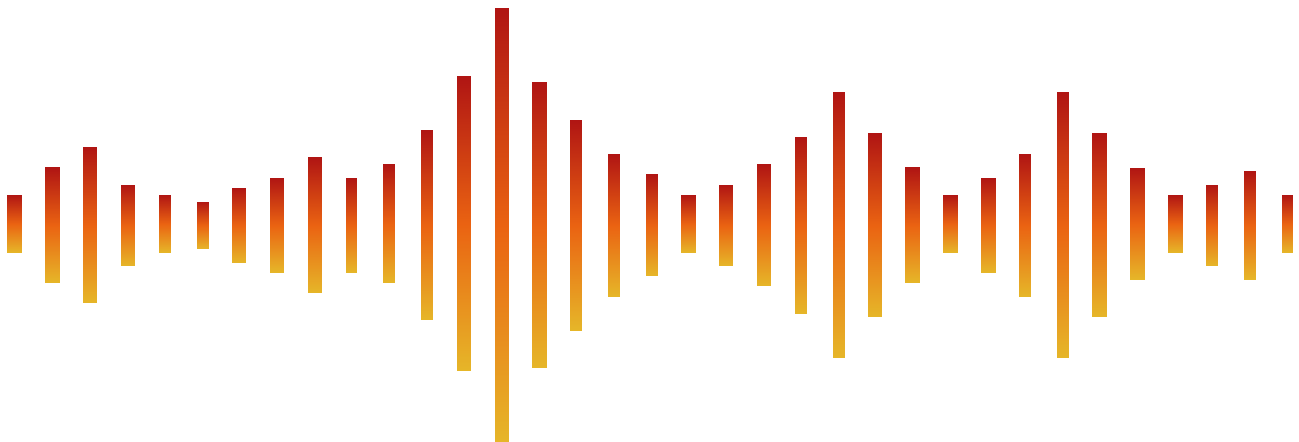

AVIOR SWAP

You may exchange crypto on the AVIOR platform, which has its own built-in switching mechanism. You may profit from non-custodial, on-chain trade settlement by swapping from your Private Key Wallet. Swapping from your AVIOR account allows you to get paid faster and receive additional perks.

Swap is popular among our Wallet users for a variety of reasons.

- Make a quick switch to an asset that you feel will grow in value. Transfer your funds from a volatile asset to one of your preferred tokens.
- Protect yourself against real-world occurrences.
- AVIOR systems are linked to the world's main cryptocurrency trading exchanges, allowing users to search for and pick the best transaction rates.

AVIOR NFT

AVIOR NFT is a major element of our ecosystem's response to NFTs. AVIOR Non- fungible tokens (NFTs) are one-of-a-kind, non-transferable assets created on the blockchain. From digital AVIOR, these tokens can be linked to anything. The main characteristics of AVIOR's NFTs distinguish them from other forms of assets and give them a distinct value include these characteristics include verifiably uniqueness and indissolubility. Because the underlying code is transparent, the scarcity and ownership of any given token can be determined without the use of a trusted middleman. The advent of NFTs, in our opinion, is part of a larger paradigm shift away from centralized to decentralized systems. The NFT project AVIOR is well-known. Each AVIOR's underlying token encodes a unique genome that specifies its look, traits, and lineage.

Our NFT holders will get the following rewards Some of the advantages of AVIOR NFT include:

1. Ownership Rights

- a. The primary benefit of non-fungible tokens is the ability to prove ownership. NFTs can assist in linking ownership to a single account because they are on a blockchain network.

2. Authenticity

- a. The advantages of non-fungible tokens are essentially determined by their rarity. NFTs are created on the blockchain, which means they are tied to one- of-a-kind data. The particular qualities of NFTs reveal their ability to add value. Simultaneously, NFT manufacturers have the option of releasing a restricted number of NFTs to create supply scarcity.

3. Fraud proof

- a. They are easily transferred and unaffected by fraud.

AVIOR NFT

The AVIOR is also going to launch its own NFT platform where users can sign up and create their own AVIOR NFT characters by the artist. Our NFTs' basic characteristics provide them a distinct value and categorically distinguish them from other forms of assets. These characteristics include verifiably uniqueness and indivisibility. Because the underlying code is transparent the scarcity and ownership of any given token can be determined without the use of a trusted middleman.

1-Easily Transferable:

The transfers of NFTs are centered on their uniqueness and indivisibility, thus the tokens are sold and purchased on a unique market.

2- Trustworthy:

NFTs are based on blockchain technologies. Consequently, you must be confident that your NFT is right, as counterfeiting a decentralized and permanent record is difficult.

3- Maintain Ownership Rights:

This is a network of open platforms the size of an NFT, with no buyer having the ability to modify the data later.

AVIOR Lending/ Borrowing

The architecture of lending is significantly altered by Avior. We don't need banks or other intermediaries to complete a loan transaction since we've decentralized lending. Decentralization also implies that once a Smart Contract is launched on the Avior network, borrowers and lenders trust it. These Smart Contracts offer a risk-free and transparent lending environment that is currently unavailable in the FIAT lending industry. No one can interfere with, interrupt, or alter the loan after it has been deployed, which is referred to as "trustless." Anyone with access to the Avior ecosystem may view the deployed transaction on the Multichain blockchain ledger. In a centralized environment, there is no analogous power.

AVIOR lends money to borrowers in exchange for a certain amount of interest, which the lender receives as a reward. To be more specific, lenders profit from interest, while borrowers can obtain loans fast and discreetly without having to deal with them personally.

AVIOR Lending is better suited to users who desire low-risk investments with consistent returns. It means that Lending is an ideal match for holders who want to keep their tokens while also earning extra money.

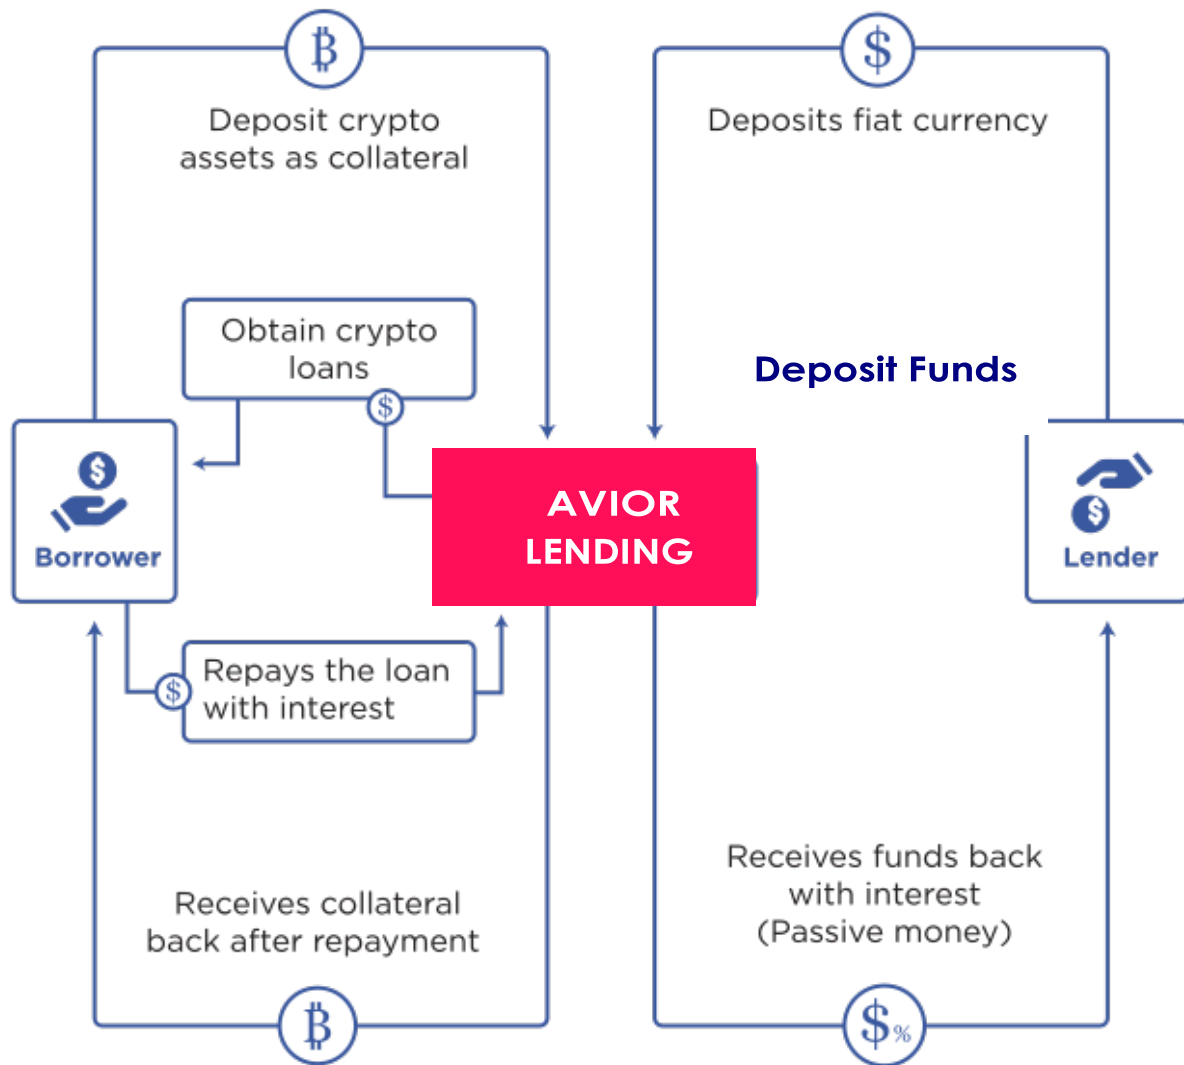

It's also straightforward to use for new crypto investors, who may lend crypto assets to generate passive income with only a few clicks. We all know that investing has some dangers, but AVIOR Crypto Lending is a relatively low-risk offering.

You might be concerned: what if the person who borrowed my cryptocurrency refuses to repay it? The point is, borrowing on the platform necessitates collateral, which assures that the lenders are paid in full for the principal and interest.

Users of decentralized lending services can apply for any size loan without having to verify their identity with a third party. Avior can be used to back loans.

How AVIOR Lending/Borrowing works?

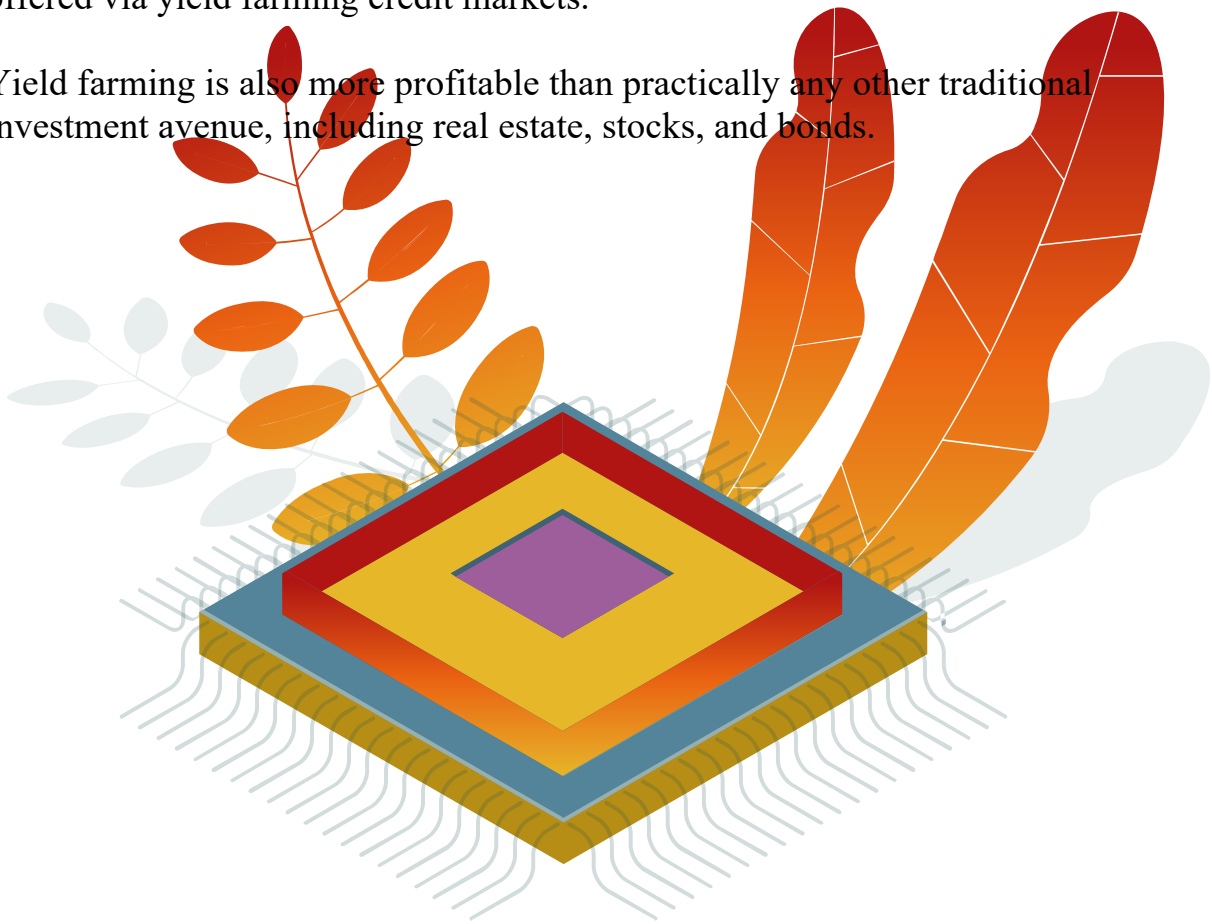

FARMING

Yield farming is a cryptocurrency reward program that has gained steam. It's similar to the yield on a bond or a dividend in terms of traditional investing. The yield on DeFi tokens fluctuates like regular dividend-paying stock or bond, depending on how these initiatives and exchanges roll them out.

It's simple to accomplish if you have a Avior Protocol account. Users can earn AVIOR tokens while also supporting AVIOR by staking LP Tokens on Yield Farms.

New techniques for crypto owners to make extraordinarily attractive returns on their cryptocurrency, at least a hundred times more than a typical bank, are being offered via yield farming credit markets.

Yield farming is also more profitable than practically any other traditional investment avenue, including real estate, stocks, and bonds.

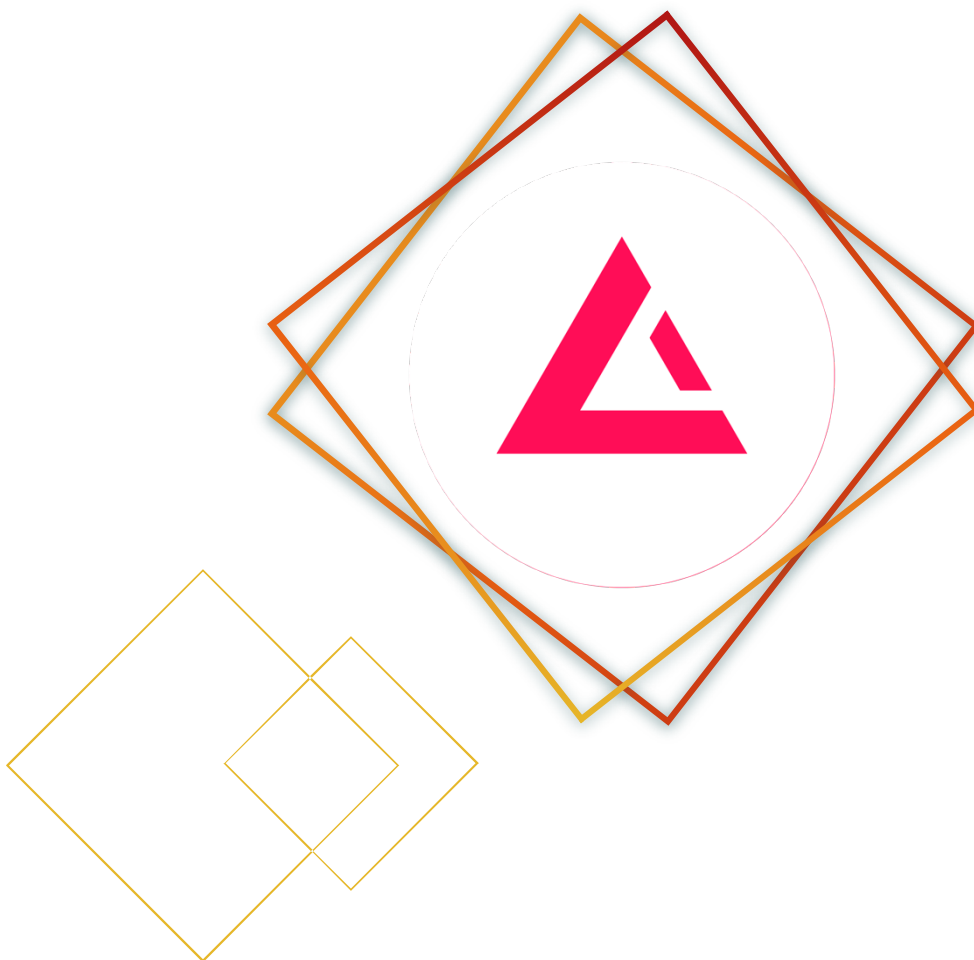

DECENTRALIZED EXCHANGE

A decentralized trading platform on AVIOR will be added, satisfying the needs of fully decentralized payments. AVIOR connects multiple chains (making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world the dominant cryptocurrency.

AVIOR guarantees outstanding speed token processing and extremely low transaction fees so that the community can easily connect. AVIOR is an easy, fast, and secure exchange creating a completely new ecosystem, built to facilitate a crypto derivative market where traders have access to a variety of trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way. it is going to launch its own decentralized exchange.

AVIOR Decentralized Exchange

It is an easy, fast, and secure exchange in a truly decentralized way. We are going to create an ecosystem where people will launch their own decentralized exchange. It connects buyers and sellers where the people can exchange their token for the desired one. The Exchange is non-custodial, meaning a user remains in control of their private keys when transacting on a DEX platform.

Advantages

1-No KYC/AML

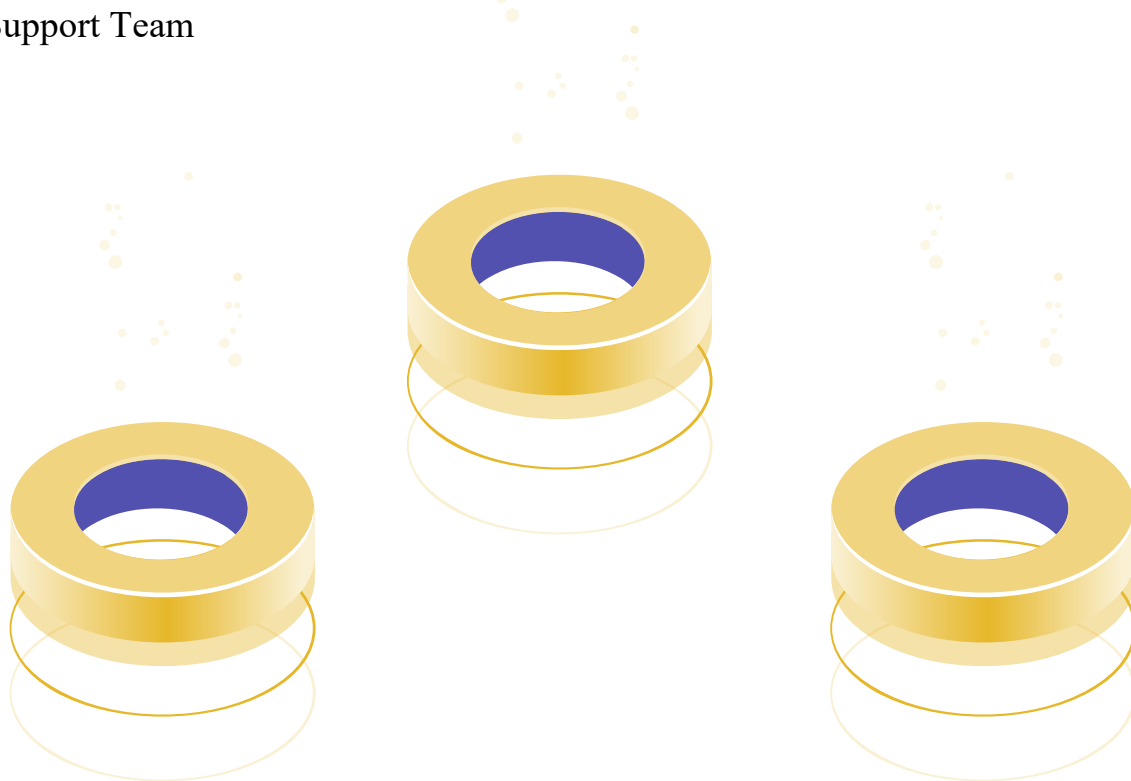

KYC/AML (Know Your Customer and Anti-Money Laundering) compliance is the norm for OUR exchanges. For regulatory reasons, individuals must often submit identity documentation and proof of address. Our DEX doesn't demand any of documents for verification purposes make the user completely anonymous.

2-Additional Features:

Powerful Matching Engine Multi-layer Security

Instant KYC and AML Verification Preferred Trader Selection Admin Panel

Support Team

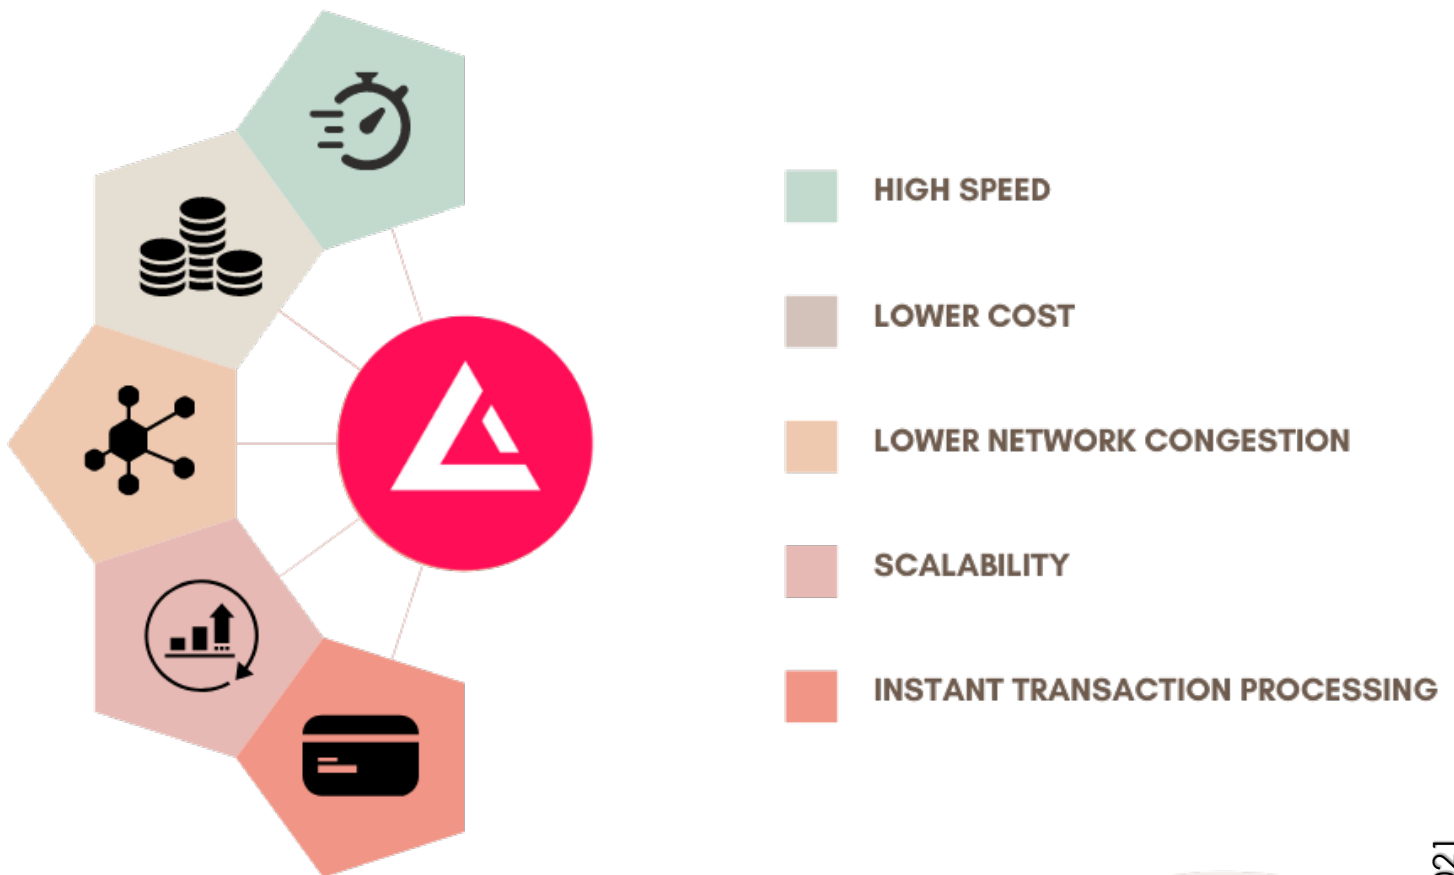

BRIDGING

AVIOR is decentralized that has decided to connect with Solana and other blockchains, allowing users to transition from one to the other. AVIOR is the first platform that operates in a cross-chain blockchain without the intervention of a third party.

Investors in the decentralized financial ecosystem are increasingly interested in cross-chain solutions. Interoperability between different chains is becoming increasingly vital as goods and platforms become more popular.

The field is constantly expanding, and one of the main roadblocks to growth has been the lack of cross-chain interoperability platforms. There have been diverse challenges within the decentralization which AVIOR is committed to solving.

Why Choose Avior (\$VIO) Token?

1. Transparency & immutability

- a. With the Avior, each time exchange of tokens is recorded on the blockchain, an audit trail is present to trace where they came token from. This can not only help improve security and prevent fraud in exchange-related businesses, but it can also help verify the authenticity of the traded assets

2. Lower Fees

- a. The fees associated with Avior transactions are far less than those associated with debit, credit cards as well as wire transfers, and BACS payments.

3. Transaction traceability

- a. Avior is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. Avior \$VIO token is formed by a complicated string of mathematical numbers and is impossible to be altered. This immutable and incorruptible nature of the gm token makes it safe from falsified information and hacks once formed.

4. Ease to use

- a. Ease of use is the reason why Avior has value. All you need is a smart device, an internet connection and instantly you become your own payments and money transfers.

Why Choose Avior (\$VIO) Token?

- **Open for global participants**
 - a. Avior facilitates the transaction and brings them closer to a wider audience. An added benefit of Avior \$VIO token use is that it's completely decentralized, so trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. Avior has no border so these can be used no matter where you are located globally. This also has a huge effect on international payment fees. Traditionally international transfers have much higher fees than domestic transfers and payments. International payments and transfers with crypto are the same as domestic.
- **Free from corporate and government interference**
 - a. Avior transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.
- **The efficiency of payment transactions**
 - a. Standard transfers and foreign purchases typically involve fees and exchange costs. Since Avior transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.
- **Multichain Blockchain Compliant**
 - a. Avior is an Multichain blockchain compliant token means that it supports a few functions of many blockchain tokens support.

Features of AVIOR PROTOCOL

Wealth Reimagined

We believe in bridging the relationship between what investors need and the distance they're from it. So we've entered the blockchain network to offer better opportunities starting with the AVIOR token.

Imagine Possibilities

We expand possibilities and challenge the status quo. Tokens that pay dividends and gives you better governance and control. Vote what you think should happen next.

Less Risk, More Reward

AVIOR Is The one of Highest BNB Reflection Token! | Earn Staking rewards By staking ! Claiming isn't needed, as it is automatically sent to your wallet.

Redefining Investment Culture

The traditional way of investing involves detailed analytics, pattern recognition, and constant risk tolerance. AVIOR digital removes the need for critical thinking and having to make sophisticated decisions. Instead, we improve upon our ideas with a hybrid approach to Innovation.

Expect opportunity

Long-term thinking is at the centre of our core values. Our focus is on building opportunities and innovating possibilities across our investor community. Thinking along the paths of consistency and making better investment products better highlight our commitment to excellence.

Security

Safety, security, and trustworthiness are our top priorities. The many benefits that blockchain and smart contracts bring make it harder to go back to solutions that often failed. We thrive on the cutting-edge of secured technology solutions.

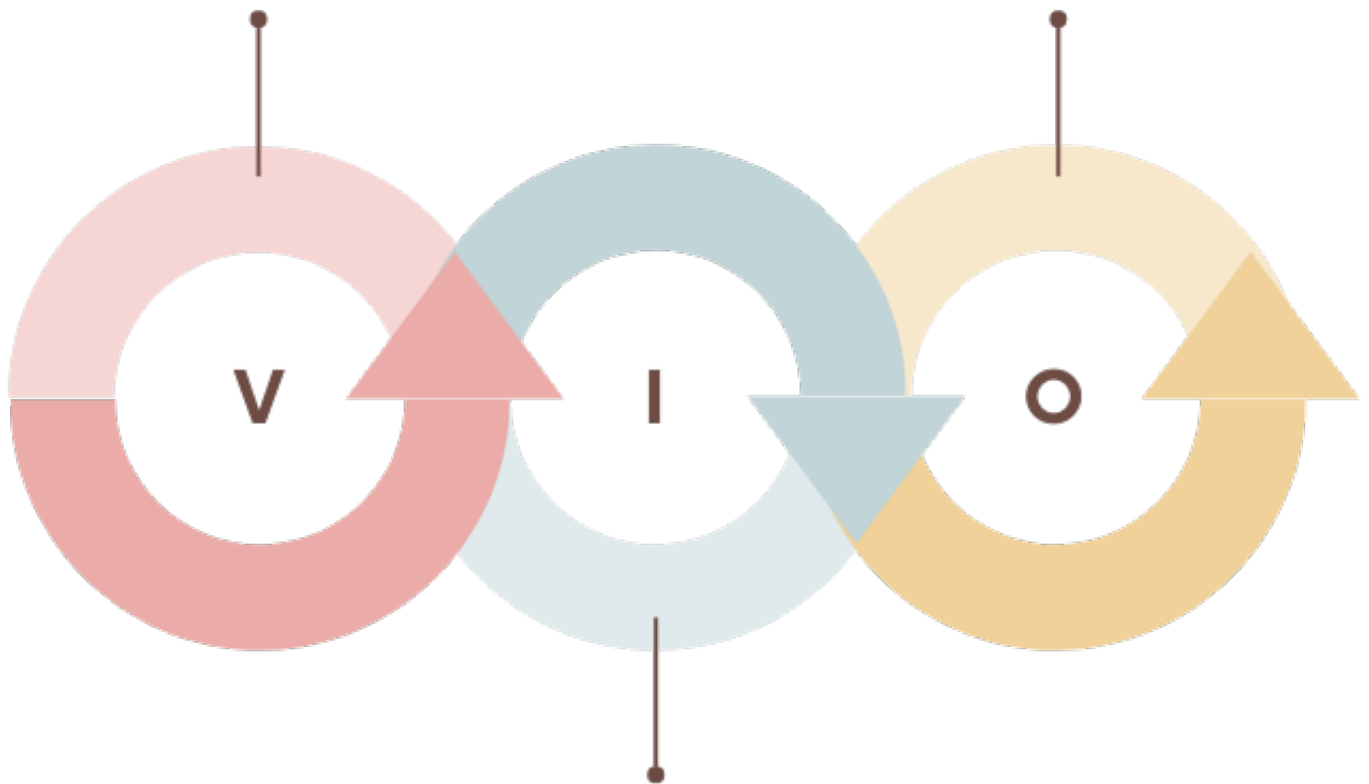

AVIOR PROTOCOL ALLOCATION

Security

30% token is allocated to liquidity mining

Marketing Wallet

5% of the Fund will be used for marketing purposes

Development

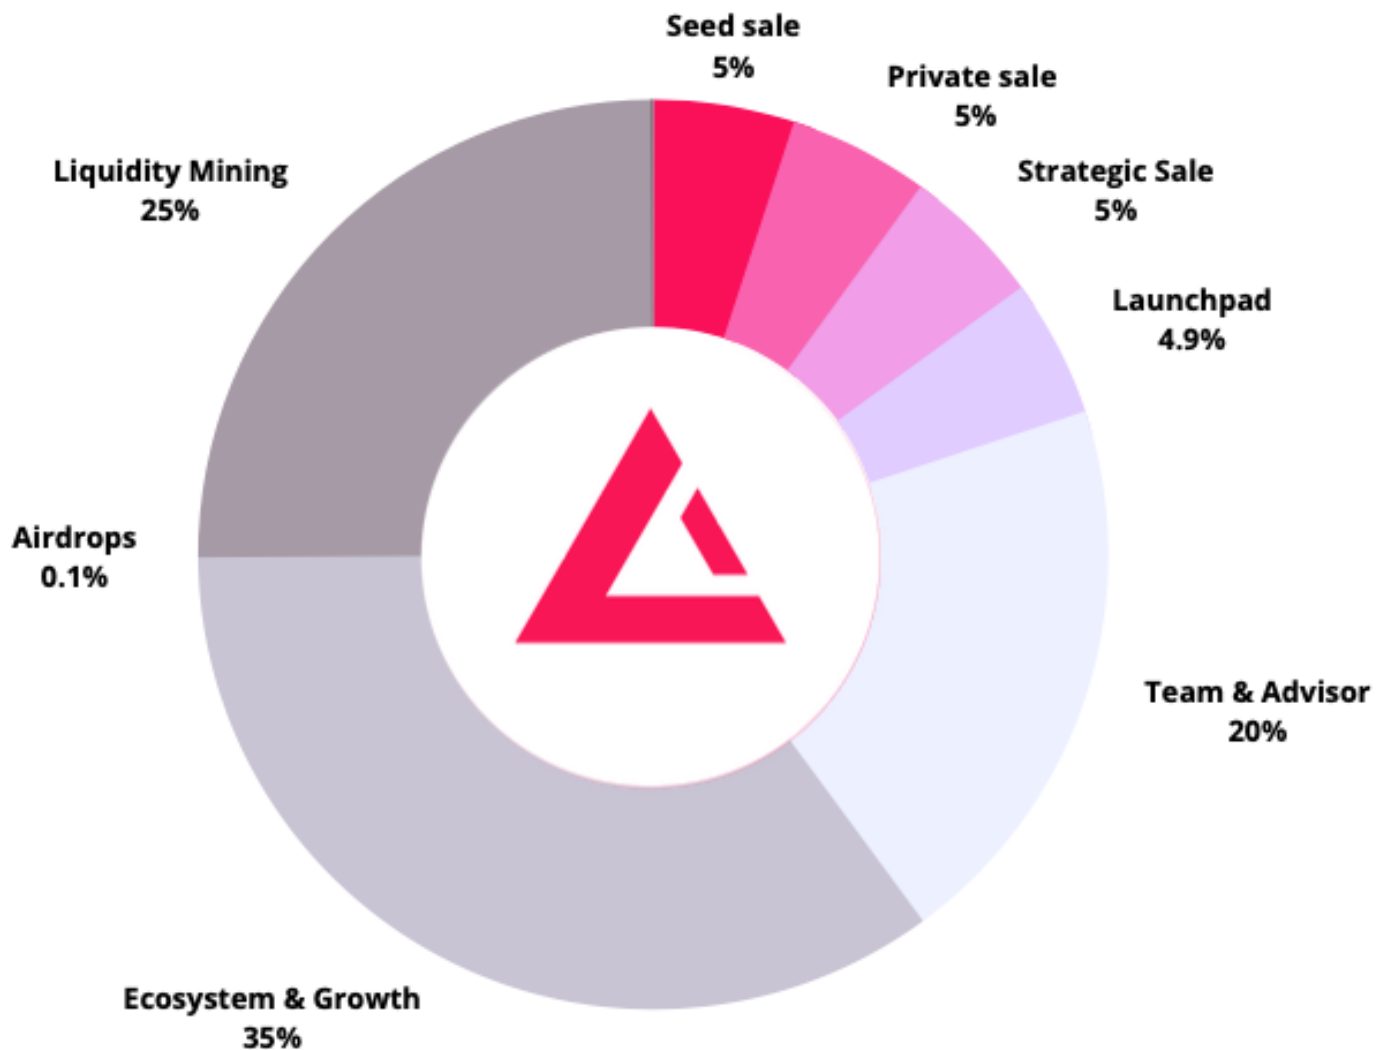

65% of funds will be used for Development

TOKENOMICS

To ensure the viability of the project long term a small portion of each transaction goes into the longevity and stability of the project:

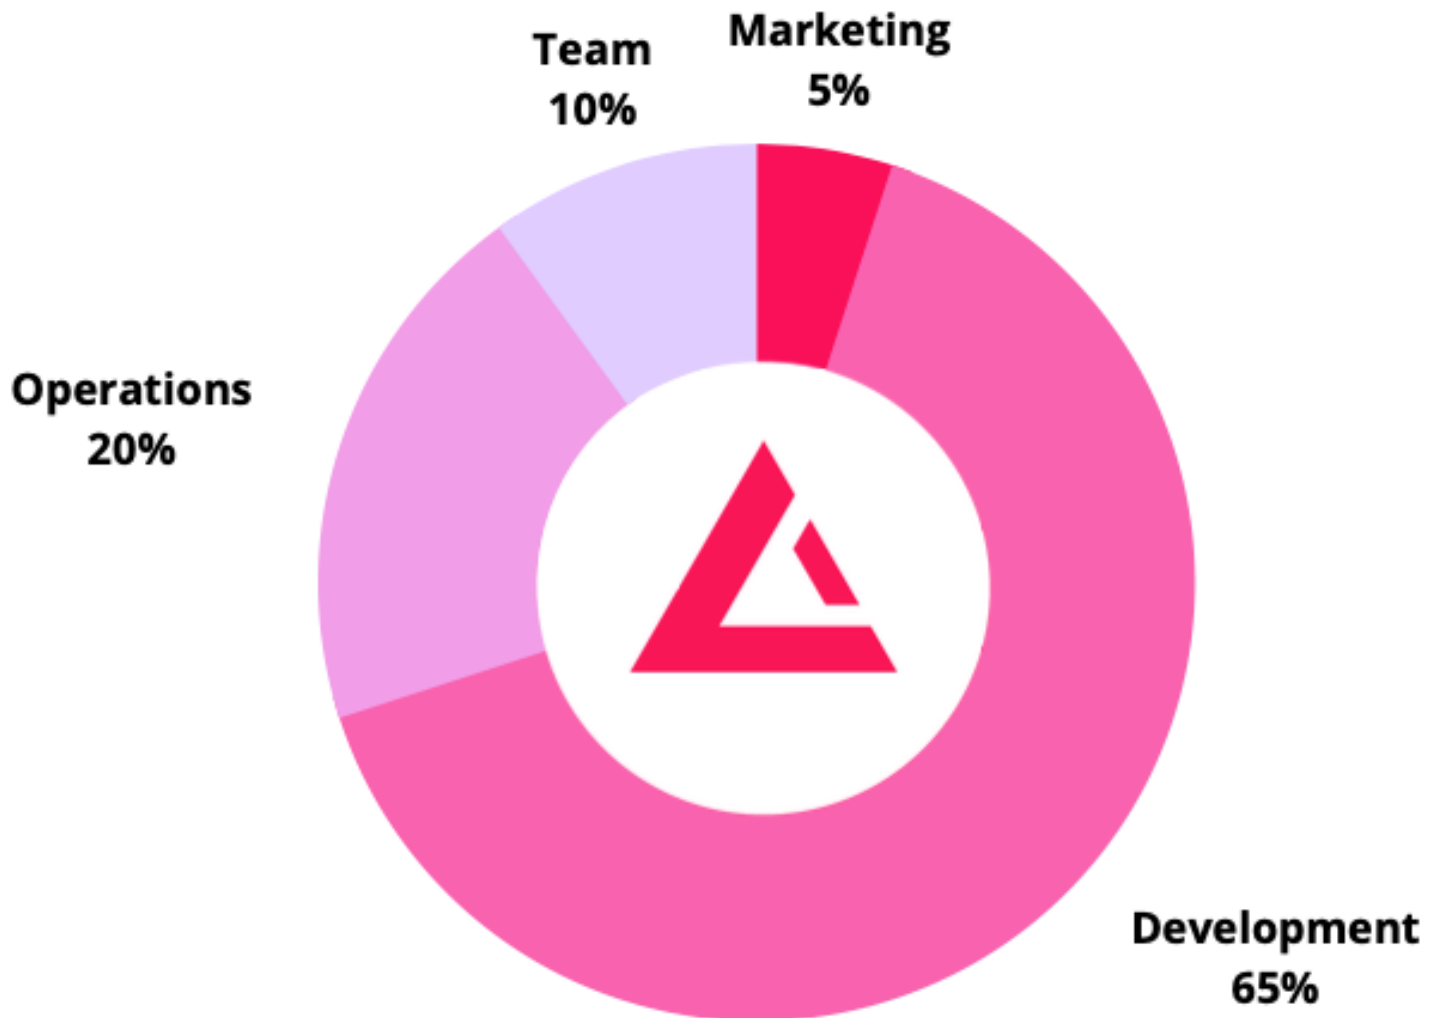

- 5% of the token is fixed for Private sale and public sale each.
- 20% of tokens are reserved for team and advisor
- 35% of the token is reserved for Ecosystem Growth

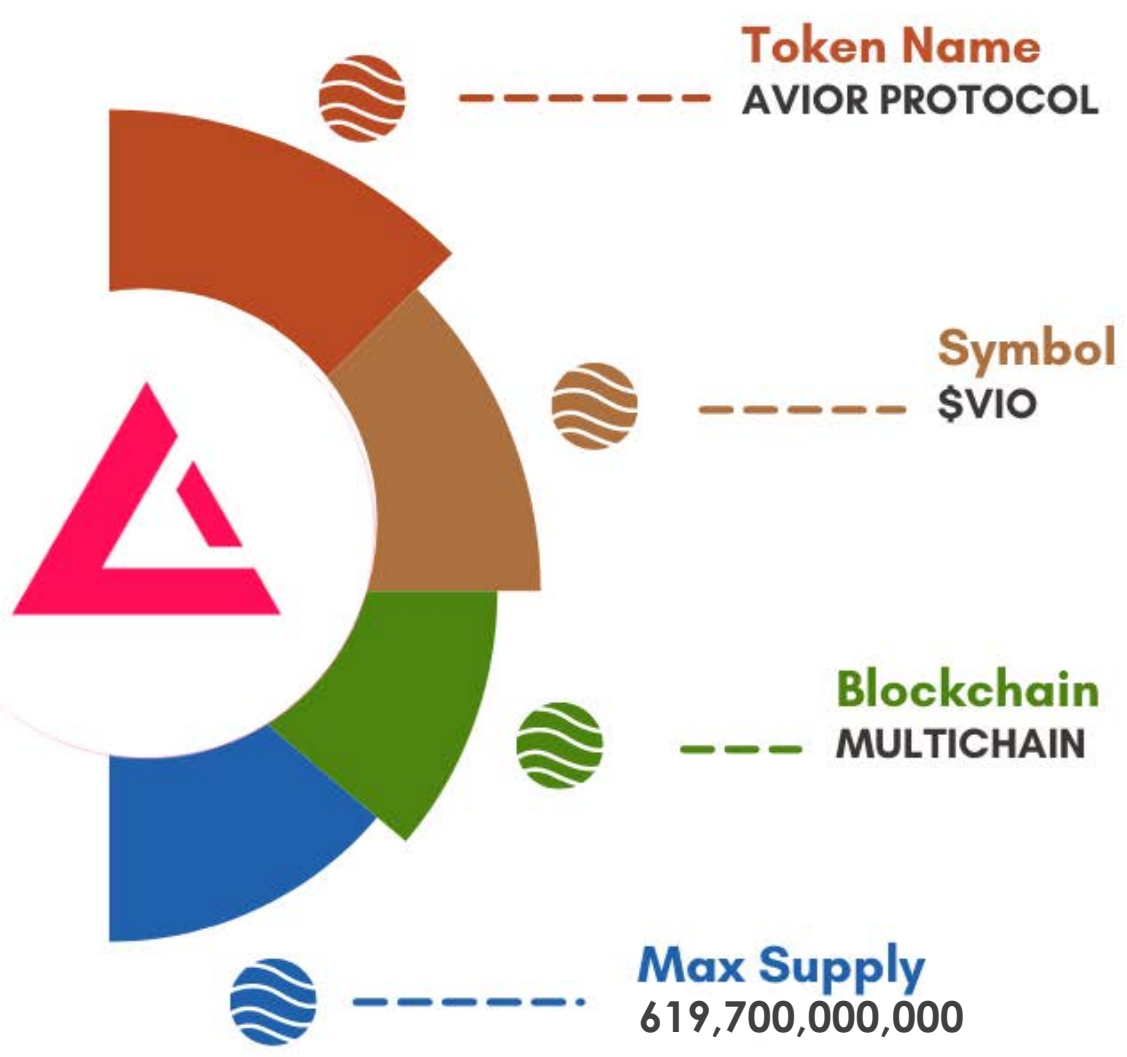

FUND UTILIZATIONS

Funds utilizations are publicly addressed to give security and ownership feeling to token holders.

ROADMAP DEVELOPMENT

| | |
|-----------|--|
| Q1 | Launche Phase 1 |
| 1 | Build an Avior Protocol Smart Contract |
| 2 | Announce the upcoming launch of the Avior Protocol |
| 3 | Creation of the final initial versions of the interface and dApp landing page. |
| 4 | Creation of final initial versions of applications for iOS and Android. |
| 5 | Launch Avior Token #VIO |
| 6 | Launch the liquidity mining program to bootstrap the Avior protocol. |
| 7 | Launch Avior Staking |
| 8 | Launch Avior Protocol on Solana chains |
| 9 | Improve existing social media infrastructure with bots, moderators, and more. |
| 10 | Complete and issue a Trail of the audit report. |
| 11 | Launch Yield Farming DAPP |
| 12 | Launch Avior liquidity pool |
| 13 | Launch Avior DEX kit |
| Q2 | Launche phase 2 |
| 14 | Launch saving/lending dapp |
| 15 | Launch barrow/dapp |
| 16 | Launch Avior swap DAPP |
| 17 | Launch Avior Stablecoin |
| Q3 | Launch Wallet Swap Kit |
| 18 | Launch mobile application |
| 19 | Extend Avior DeFi protocol interoperability to more chains. |
| 20 | Implement management contracts for chain management |
| Q4 | Create a frontend in DAPP for network management. Initiate the development of additional derivative products based on the Avior protocol, such as delta-neutral farm product, DEX-CEX arbitration, etc. |
| 21 | Redesign the user interface to handle the increased number of money markets available through the Avior protocol, such as tabs, pagination, and more. |
| 22 | Launch Chain Bridge |
| 23 | Launch CEX App |

AVIOR
